## RESUME

---

Software developer with nearly 3 years of experience building web applications using TypeScript, React, NestJS, MongoDB, and Docker. Strong problem-solving skills, ability to adapt in fast-paced environments, and effective communication in remote team settings. Proven success in delivering maintainable, high-quality code while collaborating cross-functionally.

## WORK EXPERIENCE

---

### IXC Soft – Chapecó, Brazil

Mid Level Software Engineer

Feb 2024 – Feb 2025

IXCSoft is a multinational company specializing in software solutions for ISPs, with its two flagship products being a robust ERP system and a customer service platform.

Achievements:

- Migrated front-end from legacy JavaScript to Next.js, reducing feature implementation time from ~3 days to ~1.7 days per feature. User satisfaction surveys showed an 88% approval rating due to improved load times and smoother UI interactions.
- Standardized reusable components and enforced best practices (e.g., modularization, separation of concerns), reducing onboarding time for new developers and cutting average bug resolution time by 12%.
- Fixed 150+ critical and non-critical bugs, leading to a 22% drop in support tickets related to recurring UI and API issues. This helped prevent three high-revenue clients from leaving, contributing to an estimated \$20,000 in retained annual revenue.

Responsibilities:

- Write, test and maintain new code for both front-end and back-end using NextJS, NodeJS, MongoDB and Vitest
- Collaborate with cross-functional teams, including product owners, product managers, and quality assurance, to drive product development and ensure seamless workflows while adhering to Agile methodologies.
- Refactor legacy code and interfaces, applying modern UX designs and maintainable, clean architectural patterns
- Participate in code reviews to ensure code quality, security, and adherence to best practices.
- Implement and maintain CI/CD pipelines to automate software compilation, testing and deployment, improving efficiency and ensuring consistent delivery of high-quality code.
- Analyze database performance and identify opportunities to improve speed and cost
- Create and maintain comprehensive documentation for RESTful APIs and custom-built components

## SKILLS

---

- ReactJS / NextJS
- Typescript
- TDD / Jest / Vitest
- ExpressJS / NestJS
- HTML + CSS (Sass, Tailwind, Styled Components)
- Problem Solving
- SOLID

## EDUCATION

---

### Universidade Federal da Fronteira Sul (UFFS)

Bachelor of Computer Science

Aug 2024 - Present

### Languages

---

Portuguese - Native

English - Fluent

Spanish - Basic

### Certifications

---

CS50: Introduction to Computer Science - Harvard University

December 2022
